Industry Risk Premia Company List

December 31, 2017

Note: The "Industry Risk Premia Company List" (this document) provides a list of the U.S. Companies used to calculate each of the industry risk premia (*RP*) included in the Cost of Capital Navigator (data through December 31, 2017), "Industry Risk Premia (*RP*)". The information herein is specific to the Cost of Capital Navigator (data through December 31, 2017), and is not applicable to any other book, update, or document.

Industry Risk Premia Company List

The “Industry Risk Premia Company List” (this document) provides a list of the U.S. companies used to calculate each of the industry risk premia (RP_i) calculated as of December 31, 2017 and included in the online Cost of Capital Navigator platform.¹ The information herein is specific to the industry risk premia (RP_i) calculated as of December 31, 2017, and is not applicable to any other book, update, or document.²

The *Valuation Handbook – U.S. Guide to Cost of Capital* was published from 2014–2017, and included the U.S. cost of capital data inputs (equity risk premia, size premia, industry risk premia, risk premia over the risk-free rate, risk-free rates) that were previously published in the Ibbotson Associates/Morningstar *Stocks, Bonds, Bills, and Inflation (SBBi) Valuation Yearbook* and the

Duff & Phelps *Risk Premium Report*. This data can be used to develop cost of equity capital estimates (using both the build-up method and CAPM) for an individual business, business ownership interest, security, or intangible asset.

Starting in 2018, the essential valuation data previously published in the *Valuation Handbook – U.S. Guide to Cost of Capital* (including the industry risk premia previously published therein) will be available exclusively in the new online Cost of Capital Navigator platform. *A physical book that includes the data exhibits is not commercially available.* To learn more about the online Cost of Capital Navigator, visit: dpcostofcapital.com.

¹ Industry Risk Premia were previously published in Table 3-5, “Industry Premia Estimates” in the former Morningstar Associates/Ibbotson® *SBBi® Valuation Yearbook*. In the Duff & Phelps *Valuation Handbook – U.S. Guide to Cost of Capital* (published 2014–2017) and now in the new Duff & Phelps online Cost of Capital Navigator platform these premia are still called “industry risk premia”, but the nomenclature used for this term is changed from “IRP” to “ RP_i ”.

² Starting with December 31, 2013, Duff & Phelps has produced separate “Industry Risk Premia Company List” documents for industry risk premia calculated as of each March, June, September, and December. These were originally associated with the 2014–2017 *Valuation Handbook – U.S. Guide to Cost of Capital* hardcover books, but starting in December 2017 (with this document) are associated with the industry risk premia now available on the new online Cost of Capital Navigator platform.

The Companies Used to Calculate RP_i Are Not Necessarily “Pure Play” Companies

The industry risk premia used in the Cost of Capital Navigator (formerly found in Appendix 3a of the *2017 Valuation Handbook – U.S. Guide to Cost of Capital* and its Quarterly Updates) are derived from full-information betas. “Full- information” beta analysis uses a cross-sectional regression designed to capture the impact that a company's individual business segments (defined here by SIC code) have upon the overall business beta.³

Ideally, one would like to have a sampling of betas from many “pure play” guideline public companies when estimating a proxy beta. “Pure play” companies are companies with say, at least 75% of revenue from a single Standard Industrial Classification (SIC) code. However, in some industries the largest participants may be conglomerates for which participation in the given industry is a small part of their overall revenues. In a strictly pure-play analysis, these companies would be excluded, even though they may be the dominant participant in the industry. The full-information beta approach enables the inclusion of these companies' participation in the industry in the beta calculation.

As such, the companies included in the full-information beta analysis used to create the industry risk premia in the Cost of Capital Navigator and its Quarterly Updates are not necessarily “pure play” companies:

- You may notice companies included in each industry that may seem out of place. However, these companies only impact the full-information betas (and thus the industry risk premia) by the weighted sales exposure the company has to the given industry.
- You may also notice companies listed in multiple industries. For example, General Electric is a participant in SIC 351 (Engines and Turbines), but is also a participant in SIC 363 (Household Appliances), and SIC 384 (Surgical, Medical, And Dental Instruments and Supplies).

For a detailed discussion of Industry Risk Premia, please refer to Chapter 5, “Basic Building Blocks of the Cost of Equity Capital – Betas and Industry Risk Premia” located in the “Resources” section of the online Cost of Capital Navigator platform.

³ The full-information betas shown in the Cost of Capital Navigator (and in the former *Valuation Handbook – U.S. Guide to Cost of Capital*, and in the *SBB[®] Valuation Yearbook* before that) are based on an article by Paul D. Kaplan and James D. Peterson: “Full-Information Industry Betas”, *Financial Management*, Summer 1998.

Appendix 1

Industry Risk Premia Company List (data through December 2017)

Appendix 1 is a list of the U.S. companies used to calculate each of the industry risk premia in the Cost of Capital Navigator (data through December 31, 2017).
